If this presentation has been received in error, it must be returned immediately to Metinvest B.V. (the "Company").

This presentation does not constitute or form part of any advertisement of securities, any offer or invitation to sell or issue or any solicitation of any offer to purchase or subscribe for, any securities of the Company or any of its subsidiaries in any jurisdiction, nor shall it or any part of it nor the fact of its presentation or distribution form the basis of, or be relied on in connection with, any contract or investment decision.

This presentation is not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident of, or located in, any locality, state, country or other jurisdiction where such distribution or use would be contrary to law or regulation or which would require any registration or licensing within such jurisdiction.

This presentation is not an offer of securities for sale in the United States. The Company's securities may not be offered or sold in the United States except pursuant to an exemption from, or transaction not subject to, the registration requirements of the United States Securities Act of 1933, as amended.

This presentation is directed solely at persons outside the United Kingdom, or within the United Kingdom, to (i) persons with professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 as amended (the "Order"), (ii) high net worth entities, and other persons to whom it may lawfully be communicated, falling within Article 49(2)(a) to (d) of the Order and (iii) persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000) in connection with the issue or sale of any securities of the Company or any member of its group may otherwise lawfully be communicated or caused to be communicated (all such persons above being "relevant persons"). Any investment activity to which this presentation relates will only be available to and will only be engaged with relevant persons. Any person who is not a relevant person should not act or rely on this presentation.

No representation, warranty or undertaking, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information or the opinions contained herein and no reliance should be placed on such information. None of the Company or any of its affiliates, advisors or representatives shall have any liability whatsoever (in negligence or otherwise) for any loss howsoever arising from any use of this presentation or its contents or otherwise arising in connection with the presentation. To the extent available, any industry and market data contained in this presentation has come from official or third-party sources. Third-party industry publications, studies and surveys generally state that the data contained therein have been obtained from sources believed to be reliable, but that there is no guarantee of the accuracy or completeness of such data. In addition, certain of the industry and market data contained in this presentation may come from the Company's own internal research and estimates based on the knowledge and experience of the Company's management in the market in which the Company operates. While the Company believes that such research and estimates are reasonable and reliable, they, and their underlying methodology and assumptions, have not been verified by any independent source for accuracy or completeness and are subject to change without notice. Accordingly, undue reliance should not be placed on any of the industry or market data contained in this presentation.

The presentation has been prepared using information available to the Company at the time of preparation of the presentation. External or other factors may have impacted on the business of the Company and the content of this presentation, since its preparation. In addition, all relevant information about the Company may not be included in this presentation. From 24 February 2022, the Company and its subsidiaries (the "Group") has been significantly affected by the war launched by Russia against Ukraine. As a result, future financial and operating performance is subject to a significant level of uncertainty. This presentation should be read in conjunction with the interim Condensed Consolidated Financial Information for the six months ended 30 June 2022.

This presentation contains forward-looking statements, which include all statements other than statements of historical facts, including, without limitation, any statements preceded by, followed by or including the words "targets", "believes", "expects", "aims", "intends", "may", "anticipates", "would", "could" or similar expressions or the negative thereof. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors beyond the Company's control that could cause the Company's actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding the Company's present and future business strategies and the environment in which it will operate in the future. These forwardlooking statements speak only as of the date of this presentation. The Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statements contained herein to reflect any change in its expectations with regard thereto or any change in events, conditions or circumstances on which any of such statements are based.

Individual figures (including percentages) appearing in this presentation have been rounded according to standard business practice. Figures rounded in this manner may not necessarily add up to the totals contained in a given table. However, actual values, and not the figures rounded according to standard business practice, were used in calculating the percentages indicated in the text.

The information in this presentation has not been independently verified.

Industry Overview

Global steel, iron ore and coking coal markets

The Russian invasion of Ukraine in February 2022 triggered concerns over steel supply that led to a surge in steel prices in Europe and the US in 1Q 2022. This was reinforced by the EU banning Russian iron and steel imports, as well as elevated raw material and energy prices. In 2Q 2022, the pricing trend reversed as demand eased amid the worsening global economic outlook and other market factors.

Overall, the hot-rolled coil (HRC) CFR Italy benchmark rose by 1% y-o-y to US\$1,022/t in 1H 2022. At the same time, it decreased by 4% q-o-q to US\$1,001/t in 2Q 2022. European steel price dynamics were notably influenced by the depreciation of EUR against US\$ in 1H 2022.

Given the worsening market outlook, the WSA revised downwards its 2022 forecast of global finished steel consumption, which is now expected to decline by 2% y-o-y.

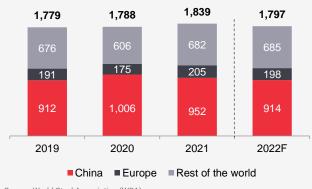

Although iron ore prices were robust in 1Q 2022, in 2Q 2022 they began to moderate amid weakness in the Chinese construction sector, the impact of China's zero-COVID policy, and recession fears in developed markets. Consequently, the 62% Fe iron ore fines CFR China benchmark was down by 24% y-o-y to US\$140/t in 1H 2022.

Pellet premiums showed different regional dynamics in 1H 2022. While the Atlantic basin premium rose by 36% y-o-y to US\$74/t, the Chinese premium shrank by 12% y-o-y to US\$50/t.

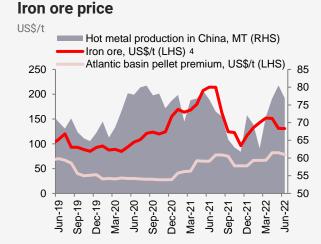

Hard coking coal (HCC) spot prices peaked in March 2022 on market rebalancing following the Russian invasion, as well as seasonal factors. The prices started to correct in the following months. HCC LV FOB USEC benchmark price surged by 157% y-o-y to US\$423/t in 1H 2022, while the HCC Premium LV FOB Australia benchmark soared by 255% y-o-y to US\$468/t.

Impact of the Russian invasion on Ukraine

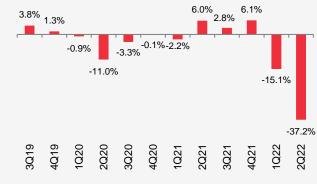

On 24 February 2022, Russia launched a full-scale military invasion of Ukraine (further referred to as "the Ukrainian Events"). In the opening stage, Russian troops occupied northern regions of the country and reached the Kyiv suburbs, but were later repelled. Henceforth, active fighting has mainly taken place in southern and eastern regions of Ukraine.

In September 2022, Ukrainian forces conducted a successful counteroffensive in the Kharkiv region, liberating a significant area from the invaders. Nevertheless, both civilian and military casualty numbers continue to increase as Russia carries out sporadic and indiscriminate attacks on Ukrainian territory and targets critical civilian infrastructure.

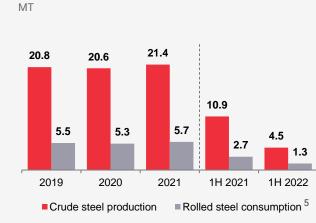

The repercussions of the war are profound and continue to mount:

- a massive migration of Ukrainian people to safer areas within¹ the country and outside² of it
- a significant reduction in Ukrainian export revenues as the invasion has blocked the lion's share of seaborne exports. In 1H 2022, export of ferrous metals & metalware declined by 44% y-o-y to US\$3.8 bn, while ore (primarily iron ore) exports contracted by 44% y-o-y to US\$2.2 bn
- numerous regulatory changes were implemented in Ukraine due to the war, including certain tax changes, restrictions on certain import and currency exchange activities, suspension of inflation targeting by the National Bank of Ukraine (NBU)
- the NBU also fixed the official exchange rate of the Ukrainian hryvnia against the US dollar at 29.25. This currency peg was then revised down to 36.57 in July
- Ukrainian crude steel production declined by 58% y-o-y in 1H 2022, while rolled steel consumption fell by 51% y-o-y

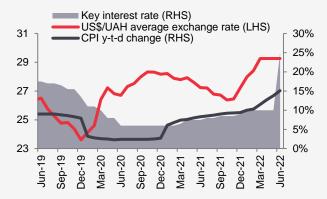

As a result, the invasion has caused significant economic losses. The EBRD³ expects Ukraine's real GDP to drop by 30% y-o-y in 2022, while the IMF⁴ forecasts it to decline by c.35% y-o-y. In April 2022, the IMF estimated that Ukraine needed c.US\$5 bn a month in external funding to finance necessary expenses. Real GDP dynamics (y-o-y)

1H 2022 Highlights

Financial highlights

Total revenues decreased by 38% y-o-y to US\$5,272 mn:

- Metallurgical revenues declined by 44% to US\$3,603 mn
- Mining revenues fell by 18% to US\$1,669 mn

Adjusted EBITDA¹ dropped by 59% y-o-y to US\$1,558 mn:

- Metallurgical EBITDA decreased by 84% to US\$287 mn
- Mining EBITDA fell by 47% to US\$1,299 mn
- The consolidated EBITDA margin fell by 15 pp y-o-y to 30%.

Net loss was US\$1,698 mn compared with a profit of US\$2,769 mn in 1H 2021.

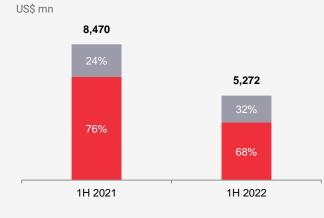

CAPEX decreased by 50% y-o-y to US\$207 mn:

- Metallurgical CAPEX declined by 63% y-o-y to US\$68 mn
- Mining CAPEX decreased by 36% y-o-y to US\$131 mn

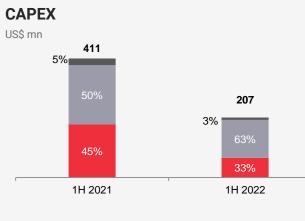

The cash balance decreased by 61% y-t-d to US\$460 mn as at 30 June 2022.

Net debt 2 to LTM EBITDA was 0.4x as at 30 June 2022, up 0.2x y-t-d.

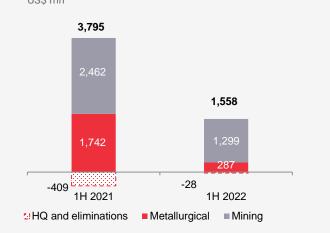

Metallurgical Mining

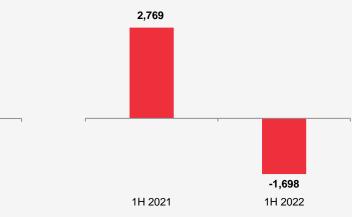

Metallurgical Mining Corporate overheads

EBITDA US\$ mn

Net (loss) / profit

US\$ mn

1. Adjusted EBITDA is calculated as earnings before income tax, finance income and costs, depreciation and amortisation, impairment of property, plant and equipment, foreign-exchange gains and losses, the share of results of associates and other expenses that the management considers extraordinary plus the share of EBITDA of joint ventures. Adjusted EBITDA will be referred to as EBITDA in this presentation.

2. Net debt is calculated as total debt less cash and cash equivalents.

Because of rounding, numbers presented in this presentation may not add up precisely to the totals provided and percentages may not precisely reflect absolute figures.

War impact on operations

On 24 February 2022, Russia launched a full-scale military invasion of Ukraine, which affected the Group's performance in the reporting period. In response to these Ukrainian Events:

- · Metinvest decided to halt the manufacturing activities of its assets in Mariupol, Avdiivka and Zaporizhzhia, including Azovstal, Ilyich Steel, Avdiivka Coke and Zaporizhia Coke. The Group's plants in Zaporizhzhia resumed their production operations later.
- Because of the hostilities, the Group's facilities in Mariupol and Avdiivka have been affected and Mariupol has been temporarily occupied.
- Output of other Ukrainian assets has been scaled back. •

- In August 2021, PrJSC "Dniprovskyi Coke Plant" (Dnipro Coke) acquired assets relating to the integral property complex of 1 PJSC Dneprovsky Iron & Steel Works (DMK), once a full-cycle steelmaker in Kamianske, Ukraine. In February 2022, Dnipro Coke was renamed PrJSC Kamet-Steel (Kamet Steel). 2

SOUTHERN GOK (JV)

ILYICH STEEL

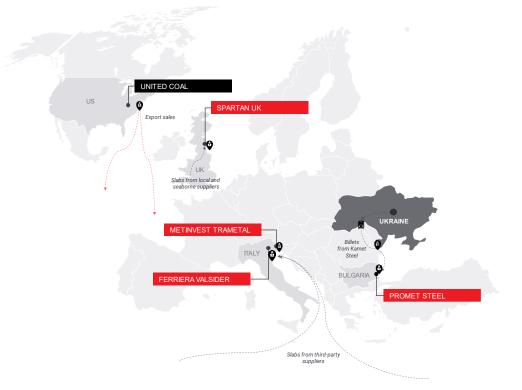

Pokrovske Coal was consolidated in March 2021.

Railway

- Metinvest's coking coal mines in the US and re-rollers in Italy and the UK were gradually adjusting their operations as standalone businesses during the reported period.
- The damage to Ukraine's assets and physical infrastructure has been extensive. Russia has blocked or occupied key seaports, while limited railway capacity with Western countries has been unable to replace seaborne throughput. This has prevented most seaborne imports and exports.

Please refer to the next slide for more details of the war impact on the Group's Consolidated Statement of Comprehensive Income.

Non-Ukrainian assets

N

Allowance for impairment of assets

Total impact of the full-scale military invasion of Ukraine on Consolidated Statement of Comprehensive Income of the Group is as follows:

- due to inability to continue in the short-term perspective normal production operations of the entities, which assets are located on the temporarily occupied territory, including assets of Azovstal, Illyich Steel, Mariupol Machining and Repair Plant, management of the Group determined that these assets are fully impaired
- The Ukrainian Events have also affected other subsidiaries of the Group. Metinvest charged an impairment allowance on the tangible assets of its subsidiaries located on the territory controlled by Ukraine, which were heavily affected by hostilities, including those from physical damage
- the Group has also deconsolidated Metinvest Eurasia and Metinvest Distribution, its traders in Russia and Belarus, and ceased operations in these countries followed by the launch of the liquidation of its subsidiaries located there

Management has determined that the inability to operate the tangible assets does not require the derecognition of these assets as the Group still holds the legal title over these assets and the limited ability to operate the assets might be temporary. Moreover, the Group may still be able to receive compensation for the assets through international courts.

Impact of the Ukrainian Events on Consolidated Statement of Comprehensive Income

Sales portfolio

Metallurgical sales

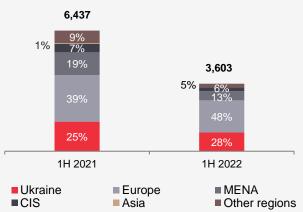

- Down 44% y-o-y, driven by a significant reduction in sales volumes due to the Ukrainian Events (deliveries of semi-finished and finished products fell by 67% and 50%, respectively).
- This was slightly compensated by higher steel selling prices in line with benchmarks.
- Logistical disruptions and product availability impacted sales geography.

Mining sales

- Down 18% y-o-y, primarily amid a 43% drop in iron ore product shipments because of Russia's naval blockade of Ukraine's ports on the Black Sea, as well as lower iron ore concentrate selling prices following the benchmark trend.
- This was partly offset by increased coking coal selling prices in line with benchmarks, a 2.1x boost in shipments of coking coal concentrate amid United Coal's volume redirection to third-party sales and consolidation of Pokrovske Coal from March 2021.
- As a result, there were significant changes in the regional shares of segmental revenues.
- Sales in hard currencies (US\$, US\$-linked, EUR and GBP) accounted for 82% in 1H 2022 (up 1 pp y-o-y).

- 2. Iron ore concentrate
- 3. Coking coal concentrate

4. Excluding railway products

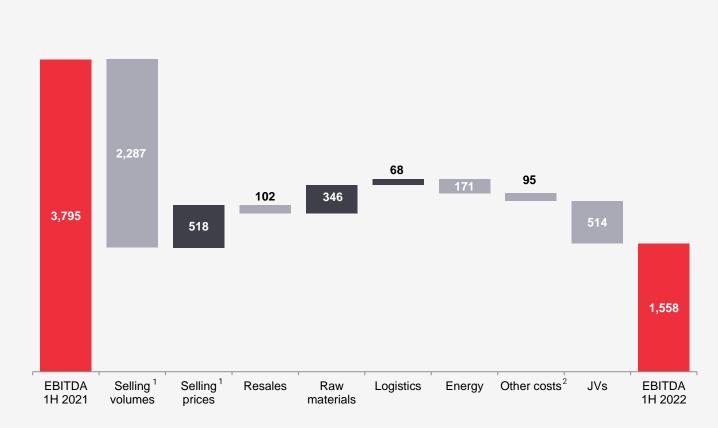

EBITDA

EBITDA decreased by 59% y-o-y to US\$1,558 mn, primarily as a result of:

- the Ukrainian Events, which affected sales volumes of in-house semi-finished, finished steel and iron ore products, as well as earnings from resales and the contribution from both JVs
- increased energy materials expenses, primarily due to higher prices of natural gas (up 3.9x y-o-y), electricity (up 67% y-o-y) and PCI coal (up 2.4x y-o-y)
- These factors were partly compensated by:
- increased steel and coking coal selling prices
- reduced spending on raw materials, primarily due to decreased consumption by the Mariupol steelmakers following the suspension of their production operations
- lower overall spending on transportation of goods, mainly due to sales volumes

EBITDA drivers

US\$ mn

1. Net of resales

2. Other costs include forex, fixed costs and other expenses; net of resales.

Debt profile

In 2022, Metinvest has continued to service its loans and borrowings, including scheduled payments on bonds.

As at 30 June 2022:

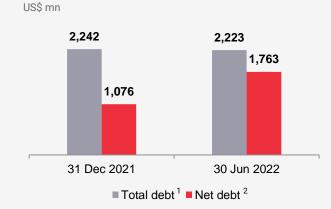

- total debt was US\$2,223 mn, down 1% y-t-d
- net debt was US\$1,763 mn, up 64% y-t-d
- net debt to LTM EBITDA was 0.4x, up 0.2x y-t-d
- share of bonds was 82% of total debt, down 1 pp y-t-d
- share of EUR-denominated debt was 22%, down 1 pp y-t-d

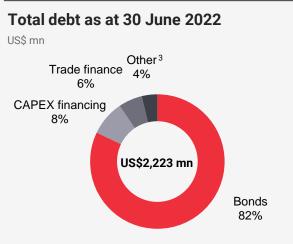

On 29 July 2022, a number of subsidiaries of Metinvest B.V. were designated as Unrestricted Subsidiaries as determined by Terms and Conditions for the purposes of each bond series. It included Ilyich Steel and Azovstal. As a result, their guarantees were automatically released.

The Ukrainian Events triggered a downward review of the credit ratings for Ukraine and Ukrainian corporates, including Metinvest:

- Moody's and Fitch downgraded the Group's credit ratings to 'Caa3/negative' and 'CCC' from 'B2/stable' and 'BB-/stable', respectively
- S&P suspended the ratings of Metinvest and its bonds because of the agency's reduced visibility regarding the Group's operations (prior to the war, Metinvest was rated at 'B+/stable')

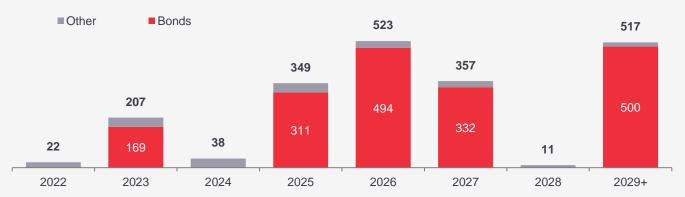

Corporate debt maturity⁴

US\$ mn

1. Total debt is calculated as the sum of bank loans, non-bank borrowings, bonds, trade finance and lease liabilities.

2. Net debt is calculated as total debt less cash and cash equivalents.

3. Debt resulting from the consolidation of Pokrovske Coal in March 2021, other bank loans and other lease liabilities.

4. Notes:

 Presented amounts of scheduled installments include principal only (without accrued interest, fees, commissions and discounts) as of 30 June 2022 (except for bonds, which take into account the results of open market repurchases after the reporting period)

• bonds: US\$169 mn at 7.75% pa due in 2023, EUR296 mn at 5.625% pa due in 2025 (converted at EUR/USD f/x of 1.0520),

U\$\$494 mn at 8.50% pa due in 2026, U\$\$332 mn at 7.65% pa due in 2027, U\$\$500 mn at 7.75% pa due in 2029

• trade finance lines are mainly rollovers, so are excluded from the maturity profile chart; lease liability under IFRS 16 is excluded

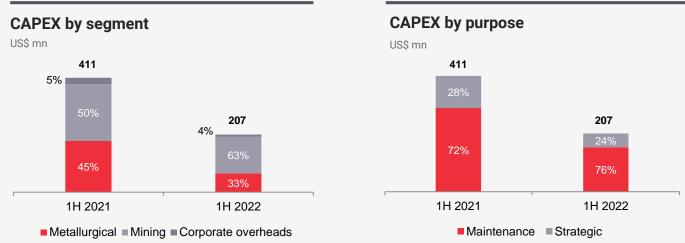

Capital expenditure

In 1H 2022:

- CAPEX amounted to US\$207 mn, down 50% y-o-y
- the Mining segment accounted for 63% of total investments (+13 pp y-o-y)
- maintenance CAPEX fell by 47%, while investments into strategic projects fell by 57%, bringing their shares in 1H 2022 to 76% and 24%, respectively

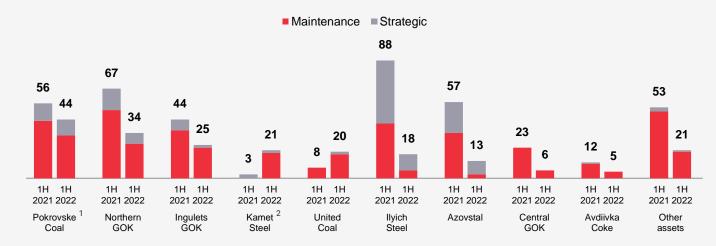

CAPEX priorities changed due to the Ukrainian Events:

- almost all ongoing strategic CAPEX projects have been suspended, except for the construction of the new mine block no. 11 at Pokrovske Coal to maintain production volumes
- the war has put on hold certain previous investment plans, including the decarbonisation roadmap
- critical maintenance will continue

CAPEX by key asset

1. Pokrovske Coal has been consolidated since March 2021

2. The integral property complex of DMK was acquired in August 2021 by Dnipro Coke and consolidated since that time. Dnipro Coke was renamed Kamet Steel in February 2022

Segmental Review

Mining operations

Overall iron ore concentrate output fell by 45% y-o-y as a result of:

- the full-scale hostilities in Ukraine
- logistical constraints amid Russia's naval blockade
 of Ukraine's ports on the Black Sea
- a significant reduction in intragroup consumption by the steelmakers in Mariupol

Merchant iron ore concentrate¹ output fell by 29% y-o-y².

• The share of high-grade concentrate was 64%, up 34 pp.

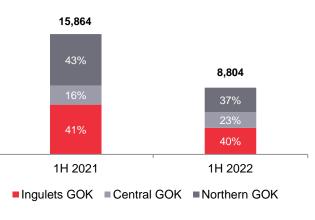

Merchant pellet¹ output fell by 48% y-o-y.

• The share of high-grade pellets reached 59%, up 28 pp.

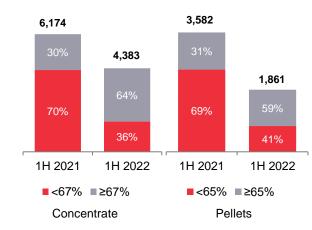

Overall coking coal concentrate output³ fell by 10% y-o-y.

- United Coal's output fell because of a deterioration of geological conditions and an ongoing shortage of skilled personnel.
- Pokrovske Coal's⁴ volumes were affected by a reduction of headcount and a disruption of supply chains amid the Ukrainian Events.

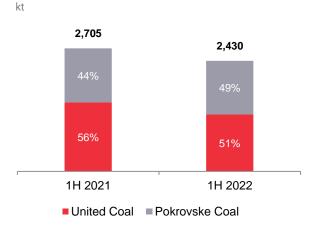

Iron ore concentrate production

Output of iron ore products by Fe % kt

Coking coal production

 Merchant iron ore product output figures exclude intragroup sales and consumption.

2. Production of merchant iron ore products in 2Q 2022 was slightly revised due to lower intragroup consumption of iron ore raw materials at the Group's metallurgical assets.

3. Excluding production from raw coal purchased from third parties.

4. Pokrovske Coal comprises several entities, the most significant of which are Pokrovske Colliery and Sviato-Varvarynska Beneficiation Factory.

Mining segment financials

Sales

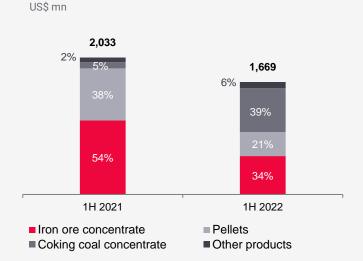

- External revenues fell by 18% y-o-y, primarily because of decreased sales of iron ore products (down 50% y-o-y). This was compensated by higher sales of coking coal concentrate (up 7.0x)
- The share of merchant concentrate grew by 3 pp y-o-y to 67% in the iron ore sales mix volume, while the share of pellets decreased correspondingly to 33%.
- The top five customers of the segment accounted for 43% of segmental sales (46% in 1H 2021).
- Overall, 27% of iron ore volumes were sold under annual contracts (63% in 1H 2021).

EBITDA

- EBITDA fell by 47% y-o-y, primarily as a result of (i) lower iron ore sales; (ii) higher energy costs; and (iii) a deterioration in the performance of the Mining JV.
- The contribution to gross EBITDA¹ totalled 82%, up 23 pp y-o-y.
- The EBITDA margin decreased by 24 pp y-o-y to 55%.

The segment's CAPEX fell by 36% y-o-y to US\$131 mn, primarily as a result of lower investments in iron ore assets (down by 52% y-o-y) and Pokrovske Coal (down by 22% y-o-y). This was partially compensated by increased investments at United Coal (up 2.5x y-o-y).

1. The contribution is to the gross EBITDA, before adjusting for corporate overheads and eliminations.

Metallurgical operations

In response to the Ukrainian Events, Metinvest placed Azovstal and Ilyich Steel in hot conservation mode, which resulted in the suspension of their production.

Meanwhile, production levels were supported by the operations of Kamet Steel, which acquired steelmaking facilities in Kamianske in August 2021.

As a result, hot metal output fell by 49% y-o-y, while crude steel production declined by 45% y-o-y.

The product mix was also impacted by these events:

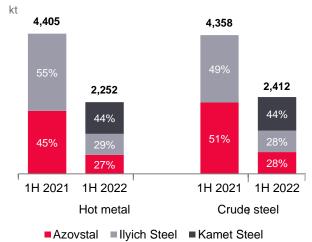

- the production suspension at the Mariupol steelmakers led to decreases in overall pig iron, slab and flat product output of 72%, 81% and 56% y-o-y, respectively
- the acquisition of production assets in Kamianske boosted long product output by 28% y-o-y, while billet output totalled 444 kt in 1H 2022

Coke¹ output fell by 55% y-o-y, driven by the impact of the Ukrainian Events.

Avdiivka Coke, which is located close to the frontline, has stopped production.

Zaporizhia Coke resumed production operations in April 2022 after they were suspended as a result of the military invasion.

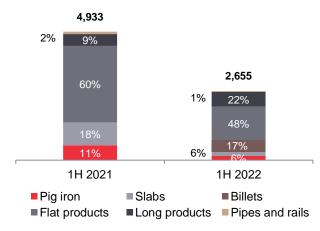

Hot metal and crude steel production

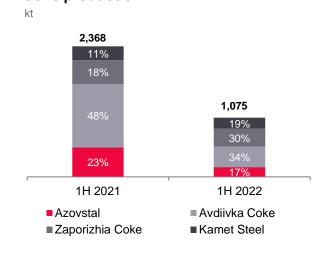

1. Dry blast furnace coke output. In February 2022, Dnipro Coke was renamed Kamet Steel.

 2021 data was revised in terms of intragroup use of hot-rolled plates and cold-rolled coils. The output of cold-rolled sheets is included in the output of cold-rolled coils.

Metallurgical segment financials

Sales

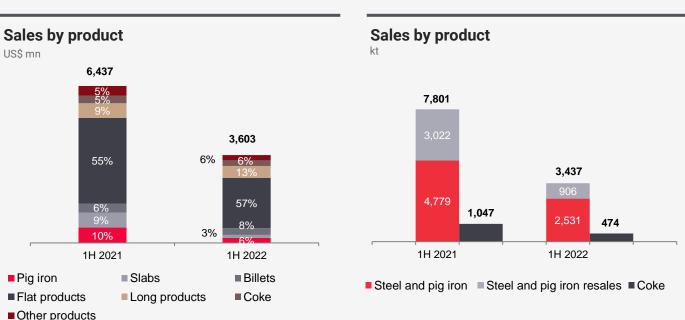

- External sales decreased by 44% y-o-y, as a result of lower shipments of all products, which was partly compensated by higher prices.
- The top 5 customers accounted for 16% of segmental revenues, flat y-o-y.
- · Almost all steel volumes were sold on the spot market.

EBITDA

- EBITDA decreased by 84% y-o-y, mainly because of (i) a lower segmental top line; (ii) higher energy costs; and (iii) a deterioration in the financial performance of the Metallurgical JV.
- The contribution to gross EBITDA¹ dropped by 23 pp y-o-y to 18%.
- The EBITDA margin declined by 19 pp y-o-y to 8%.

Segmental CAPEX decreased by 63% y-o-y to US\$68 mn, mainly because of the Ukrainian Events. This was partly compensated by increased CAPEX at Kamet Steel (up 7.0x y-o-y) to US\$21 mn.

| US\$ mn | 1H 2022 | 1H 2021 | CHANGE |
|-------------------------------|---------|---------|--------|
| Sales (total) | 3,656 | 6,492 | -44% |
| Sales (external) | 3,603 | 6,437 | -44% |
| % of Group total | 68% | 76% | -8 pp |
| EBITDA | 287 | 1,742 | -84% |
| % of Group total ¹ | 18% | 41% | -23 pp |
| Margin | 8% | 27% | -19 рр |
| CAPEX | 68 | 184 | -63% |
