

## Metinvest opened Steel Service Center in Vinnitsa

Metinvest, within the framework of client oriented sales policy, continues to expand distribution network and opened Steel Service Center in Vinnitsa. With introduction of the second Steel Service Center in the west of the country the company can better and timely meet the requirements of regional customers providing more effective cooperation.

At new Steel Service Center it is planned to maintain constant warehouse reserve of no less than 6 thous. t., represented by complete product mix of rolled steel products produced by Metinvest Group enterprises: re-bars, angles, beams, channels, plates, pipes and other products. Three cranes work at the site, two of them are travelling cranes and one is trestle crane with loading capacity from 12 to 20 t. Overall area of Steel Service Center makes up 1288 m<sup>2</sup>.

Warehouse complex in Vinnitsa complies with all necessary standards of the state-of-the-art Steel Service Centre — availability of wide product mix, cutting and delivery service. In the process of distribution network developing, Metinvest constantly tends to provide customers with convenient logistics and high level of customer service.

«Proximity to the client, the most complete product mix and service are the basic for development strategy of Metinvest- Steel Service Center. Therefor we will continue to fortify our positions and in 2012 plan to open several more Steel Service Centers in the western region of Ukraine, offering fruitful and mutual partner cooperation to a wide range of potential customers», — noted Albert Avanesov, General Director of LLC «METINVEST-SMC».
