

Metinvest Digital Becomes IT Partner of Ukrtelecom

Metinvest Digital, the IT expertise center of Metinvest Group, has won a tender for the provision of support to IT services of Ukrtelecom, one of the largest telecommunications operators in Ukraine.

In particular, Metinvest Digital will provide support to data storage and backup systems, and participate in the development of these services.

Sergey Detyuk, General Director of Metinvest Digital:

- We are glad that more and more companies trust our expertise. The application of digital technologies is not a feature of any particular market or industry, but a must for any business. And our experience in the digital transformation of business is most suitable for large companies, where the number and scale of interlinked projects, as well as the complexity of changes grow by a wide margin.

Metinvest Digital is ready to share its expertise in order to become a long-term full-fledged IT partner for our customers.

Kirill Goncharuk, IT Director of Ukrtelecom:

- Ukrtelecom's IT infrastructure is a basis for the operation of all operator information systems, and the operation of all key business processes depends on its stability. Therefore, it was especially important to select a reliable and experienced outsourcing partner in order to ensure the continuity of IT services. I am glad that we will be able to use the experience of colleagues from Metinvest Digital to support critical systems and data storage networks of Ukrtelecom.
