

Khartsyzsk Pipe is operating normally

A number of internet sources continue to disseminate incorrect information about the seizure of Metinvest Group's Khartsyzsk Pipe by armed people.

The administration and the trade union committee of Khartsyzsk Pipe state that the enterprise is operating normally.

Yesterday night, armed representatives of the Donetsk People's Republic arrived at the plant's central checkpoint. They referred to an order from their commanders, took 10 of the plant's vehicles, and then left the territory of the plant.

Currently all production processes at Khartsyzsk Pipe are being performed according to the established production schedule. Infrastructure and auxiliary functions are operating as usual.
