# Metinvest Digital received Silver competencies of Microsoft for security assurance and cloud applications development

Metinvest Digital, Metinvest Group's IT excellence centre, has been certified and expanded its status as Microsoft's certified partner in competencies on security solutions – Microsoft Silver Security, and Microsoft Silver Application Development.

Microsoft Silver Security competency confirms that the company's experts possess deep technical and management knowledge, as well as the skills and experience needed to develop, implement and manage comprehensive information security programs based on the Microsoft's platform in the areas of:

- protecting information and user devices;

- managing access and user identification;

- building event monitoring and security systems against cybersecurity threats.

Microsoft Silver Application Development certification demonstrates Metinvest Digital's high level of expertise in developing, implementing and maintaining Microsoft Azure cloud applications and services from requirements determination and design to developing, deploying, and monitoring embedded systems.

Sergey Detyuk, General Director of Metinvest Digital:

"Acquiring new expertise in technologies developed by Microsoft, the leader in providing smart solutions for digital business transformation, confirms the high level of professionalism of our team of experts. Metinvest Digital is a young but very ambitious company that in just two years of its existence has become a certified partner of Microsoft in seven competencies. We do not rest on our laurels and continue our certification to expand our expertise and provide the highest quality IT solutions for our customers".

Metinvest Digital is a certified Microsoft partner. Last year, the company received the status of Microsoft Gold Certified Partner in competencies Gold Cloud Platform, Gold Data Platform, Gold Windows and Devices, Gold DevOps and Gold Data Analytics.
