

## OCCUPATIONAL HEALTH AND SAFETY

# INVESTMENTS IN SAFETY

Metinvest continues to invest in safe working conditions to ensure the wellbeing of its employees. In the reporting period, spending on health and safety amounted to US\$102 million, up 7% year-on-year from US\$95 million in 2018. We substantially increased investments in the safety of workplaces, buildings, facilities and transportation.

We closely follow the latest advances in machinery and equipment to continually improve safety at our production sites. New multigas analysers purchased in 2019 feature increased sensitivity for detecting a substantial number of gases, which reduces the risk of poisoning at sites with gas-related hazards. To ensure the safe inspection of buildings and structures in hard-to-reach or hazardous areas, we have purchased drones that can help to perform risk and hazard identification and send an alert to site operators.
